Art Unit: 2823

Applicant's election without traverse of the invention of Group II, claims 1-13 in Paper No. 8 is acknowledged.

Further restriction between the inventions of claims 1-13 is required as follows.

This application contains claims directed to the following patentably distinct species of the claimed invention: the first species wherein a metal nitride film is formed on the bottom and side wall of an insulating film patterned to expose a silicide film and a 10msec heating process using light whose main wavelength is shorter than a light absorbing end of silicon during a  $<600^{\circ}\text{C}$  heating process followed by forming a contact conductor and wiring, the second species which is similar to the first species except that the light is used whose reflection coefficient for metal including metal nitride is 0.5 or lower, the third species wherein metal is formed on a gate and source drain regions and converted to monosilicide followed by a 10msec heating process using light whose main wavelength is shorter than a light absorbing end of silicon during a  $<600^{\circ}\text{C}$  heating process, the fourth species wherein a polysilicon film is doped by implantation and covered with a nitride film with heating with white light as recited in claim 11 and patterning of the polysilicon film and the nitride film and the fifth species wherein a silicide layer is formed on a second polysilicon film with heating with white light as recited in claim 13 and patterning the silicide, polysilicon and inter-electrode insulating films.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 2823

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

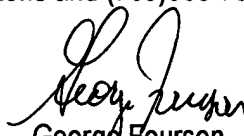

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956. See MPEP 203.08.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner George Fourson whose telephone number is (703) 308-2544. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri, can be reached on (703) 306-2794. The fax number for this group is (703)308-7722 (or extensions 7724, 3431 or 3432) for regular communications and (703)308-7382 for after final communications.
